

CLEAR GLASS SINK CLEANING & MAINTENANCE INSTRUCTIONS

How to clean your glass vessel sink:

In order to prolong the life of your new glass vessel sink, simple and quick daily maintenance is the key to keep your sink in its beautiful original condition. Make sure you rinse your sink out after each use, if water spots appear you can wipe them off with a towel or dry cloth. About once a week clean your sink with a soapy soft sponge (not medium or hard), anti-bacterial hand or dish soap is preferred, then rinse thoroughly with hot water. You may dry it with a towel or a dry cloth afterwards. This will help eliminate water spots and streaks while the sink is in use.

Abrasive bathroom cleaners will scour and dull the finish of the glass, causing it to lose its high luster and shine. Some cleaners may also scratch the surface of the sink. Avoid using these types of abrasives or cleaners.

What **NOT** to use to clean your glass vessel sinks:

- Coarse cleaners with grit
- Acidic chemicals
- Steel wool
- Brillo pads
- Wire brushes
- Pumice products
